

JAMISON OAK

JAMISON

OAK WOOD

NATURAL FINISH

JAMISON The natural beauty of genuine oak. Jamison Oak's quiet strength and simple good taste transform any kitchen into a showcase. Raised panel design, traditional profile and glass mullion doors add pleasing contours, depth and dimension. With Jamison Oak, you won't have to tell friends and family about your new kitchen. The cabinetry will do all the talking for you.

JAMISON OAK

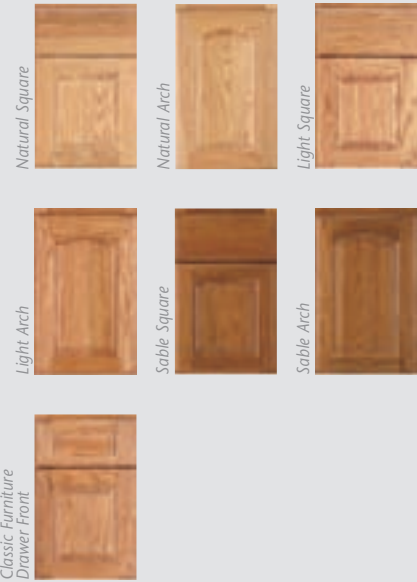

JAMISON | OAK WOOD | LIGHT FINISH

JAMISON LAUNDRY ROOM Functional? Of course. Durable? Certainly. Stylish? Absolutely! This practical laundry room in Jamison Oak Light is a masterpiece of clean lines, rugged strength and the timeless beauty of genuine oak. Stacked appliances with oak trim panels combine eye-level convenience with a broad expanse of natural oak hardwood that rivals custom cabinetry. And look at all the organization space!

There's no substitute for genuine oak. Dramatically grained, it glows from within, lending warmth and strength to any setting.

Every home has different needs and every homeowner has different tastes. That's why we offer Custom Choice. If you have unique ideas for your dream kitchen, Custom Choice allows you to modify an existing HomeCrest design into exactly what you want. You can also order cabinets in special sizes and add decorative doors or create one-of-a-kind furniture pieces. Your design options are virtually limitless.

All HomeCrest cabinets meet or exceed the requirements and specifications of ANSI A161.1/2000 and are certified in accordance with KCMA specifications. HomeCrest takes great care in the selection and application of materials to give your cabinetry a fine furniture finish. Solid wood frames are finished with stain and a durable catalyzed varnish. By nature, hardwoods expand and contract with temperature and humidity level changes and over time seam lines will form at front frame joints. Additionally all surfaces will be affected by exposure to sunlight, smoke, household cleaners and other substances making it difficult to match existing cabinetry at a later date. This is especially true on light or frost finishes. These occurrences are normal and not the result of defects in materials or workmanship. On thermofoil lines HomeCrest recommends providing a 1-1/2" clearance between thermofoil surfaces and any heat source. This is especially important when installing ovens with self-cleaning features. Due to continuous product improvements, specifications are subject to change without notice. Colors depicted in printed photographs may not reflect actual finish color. Please contact your HomeCrest representative for color samples.
